

## Project Design Phase-II Technology Stack (Architecture & Stack)

|               |  |
|---------------|--|
| Date          | 03 October 2022                                    |
| Team ID       | PNT2022TMID23570                                   |
| Project Name  | Project - Analytics for hospital's healthcare Data |
| Maximum Marks | 4 Marks  |

### Technical Architecture:

**Table-1 : Components & Technologies:**

| S.No | Component                       | Description   | Technology   |
|------|---------------------------------|---|--|
| 1.   | User Interface                  | How user interacts with application e.g. Web UI, Mobile App, Chatbot etc.                                     | HTML, CSS, JavaScript / Angular Js / React Js etc.             |
| 2.   | Application Logic-1             | Logic for a process in the application  | Java / Python  |
| 3.   | Application Logic-2             | Logic for a process in the application  | IBM Watson STT service   |
| 4.   | Application Logic-3             | Logic for a process in the application  | IBM Watson Assistant   |
| 5.   | Database                        | Data Type, Configurations etc.  | MySQL, NoSQL, etc.   |
| 6.   | Cloud Database                  | Database Service on Cloud   | IBM DB2, IBM Cloudant etc.                                     |
| 7.   | File Storage                    | File storage requirements   | IBM Block Storage or Other Storage Service or Local Filesystem |
| 8.   | External API-1                  | Purpose of External API used in the application   | IBM Weather API, etc.  |
| 9.   | External API-2                  | Purpose of External API used in the application   | Aadhar API, etc.   |
| 10.  | Machine Learning Model          | Purpose of Machine Learning Model   | Object Recognition Model, etc.                                 |
| 11.  | Infrastructure (Server / Cloud) | Application Deployment on Local System / Cloud<br>Local Server Configuration:<br>Cloud Server Configuration : | Local, Cloud Foundry, Kubernetes, etc.                         |

**Table-2: Application Characteristics:**

| S.No | Characteristics          | Description                                     | Technology   |
|------|--------------------------|---|--|
| 1.   | Open-Source Frameworks   | Open-source frameworks used                     | IBM Cognos analytics,Python  |
| 2.   | Security Implementations | Request authentications using encryption        | Encryption   |
| 3.   | Scalable Architecture    | Scalability consist of 3 – tiers                | Dashboard - IBM Cognos analytics<br>Application server – Python<br>Database server – IBM cloud |
| 4.   | Availability             | The application is available for cloud users    | IBM cloud hosting  |
| 5.   | Performance              | The user can know the prolonged period of stay. | ML Algorithms  |
